

HydroWhirl™ S slotted rotating spray nozzle for quick, efficient tank cleaning

The HydroWhirl™ S nozzle directs the cleaning water through a rotating head at the tip of the spray assembly. This produces a vigorous moving spray action against all areas of the walls of a tank. The spray pattern from the HydroWhirl S head uses impact and repetition to quickly wash the tank. This spray pattern is especially effective at breaking up and removing contaminants.

Advantages of the HydroWhirl S rotary spray nozzle.

- Cleans more quickly, but uses less water and lower pressure than static tank washers
- Complete 360° coverage
- Lower flow and pressure mean smaller pump size resulting in lower operating costs

The HydroWhirl S nozzle has been carefully designed for long service life.

Low-maintenance bearing design

- Self-cleaning bearings are lubricated by water flow to clear away particles

High-precision machining and finish

- Stainless steel construction – corrosion resistant
- Orbital welded design – durable assembly
- Made from rolled steel, not forged – no internal stress points
- Surface finish of 0.8 microns R_a or better
- 100% welded assembly
- Made to BETE quality standards by European high-precision stainless steel fabricator
- Made from FDA-approved materials for use in Clean-in-Place (CIP) applications

Comprehensive quality control

- Material traceability controlled throughout production
- Lab testing validates minimum service life of 300 hours

Surface finish ideal for sanitary applications

Design flexibility

- Available in many different sizes and connections – threaded, clip-on or welded
- 360° omni-directional spray pattern standard; other spray angles available upon request
- Flow range: 3.72 – 89.7 gpm
- Dual bearing design – nozzle operates effectively in any orientation

The HydroWhirl S nozzle is an outstanding combination of design, quality, and engineering. The HydroWhirl S nozzle is ideal for anyone who needs reliable, efficient cleaning of tanks and other interior spaces.
